

fast, effective

and friendly IT support for growing businesses

The Emergency Service
for computers in the
London area

What our customers say

Tom Breza of PC Service set up the ROA computer systems approximately five years ago and has expanded and maintained these systems since then. Subsequently we started a house magazine, which was produced within the office. This required a further expansion of our systems, and communications set up between Microsoft and Apple Macs. It also required the installation of a much more powerful server. At all times PC Service have been efficient and reliable and have responded quickly to any concerns that we have. Yours faithfully

Michael Harris - Chief Executive - ROA

Having dealt with PC Service for several years now I have always found that they are extremely attentive to all our IT requirements and react very quickly to any problems that arise. I wouldn't hesitate to recommend them to any other medium-sized business.

Mike Box - XL Talent.

My company has used PC Service for over seven years to date. We are currently on an ongoing support contract with this company, with which we are extremely happy. I have always found Tom and his employees to be polite, prompt, and efficient, and more important than this they actually know what they are doing. I would have no hesitation in recommending PC Service to any company as they have always worked well for me.

Guy Watson - Managing Director - Home Made Ltd

PC Service has proved to be a most professional company. They are efficient, reliable and thorough when fixing any network problems we have reported. Recently, they have also helped us to upgrade and improve both our network and broadband systems to increase our capacity. This was completed quickly, with the minimum of impact to our working day. All technicians are polite, methodical and helpful in their approach. We would have no hesitation in recommending PC Service for any companies' IT needs.
